### Project “New materials for future batteries”

Prof. Katharina M. Fromm

---

#### Events

Presentation of the project at the LiBD2015 "Lithium Battery Discussions" - Electrode Materials, June 21- 26, 2015 at "Palais des Congrès" of Arcachon, France. The LiBD-7 conference focused on discussions of all basic aspects of positive and negative electrode materials for Li (ion) batteries. It also included topics related to interfaces and interfacial phenomena, and topics beyond classical Li-ion batteries: <http://libd2015.sciencesconf.org/>
